

What teachers are saying about EDNET faculty training

"Liked the technical discussions. Super friendly people. Awesome experience." Math Teacher in Beaver School District.

"Workshop was well done and appreciated." History Teacher in Weber School District.

"Liked the chance to perform and share ideas with others." Drama Teacher in Granite School District.

"Liked the high level of involvement and hands-on training." Signing Instructor at the Schools for the Deaf and the Blind.

"Liked seeing how a real EDNET site is set up and works." Philosophy Instructor at Utah Valley State College.

"Enjoyed the friendly, relaxed atmosphere. Everyone got to participate." Math Professor at Snow College.

"Want more PowerPoint Presentations™ practice." Spanish Teacher in Box Elder School District.

"I need more time in front of the camera. The instructors were outstanding." Business Teacher at Ogden-Weber Applied Technology College.

"I need more practice. Liked the mini-lessons and Internet activities." Calculus Teacher in Tooele School District.

"The hands-on training was very helpful. I could sit at the console and run the equipment." Business Teacher at Bridgerland Applied Technology College.

"I liked the teacher presentations (mini-lessons) and the evaluations of their teaching." French Teacher in Washington School District.

"The hands-on practice was fun! Playing the role of facilitator was great practice." ASL Teacher at USDB in Salt Lake City.

"I like EDNET classes and the way they are set up. It makes learning just as good as it is was in an actual classroom." Student, Morgan High School, Fall 2002

Preparing
Teachers
for

Technology

Mission statement

Distance Learning Faculty Training provides training for teachers that focuses on the key concepts of accessing information, resources, and people (team approach) to produce organized, creative, meaningful, and engaging instruction utilizing the EDNET technology. The outcome is a quality learning experience for students maximizing the capabilities of the delivery system.

EDNET Faculty Training Writing Team

May 12, 1995

EDNET is the Utah Education Network's interactive system that electronically brings a teacher from one classroom to another, allowing students access to classes not otherwise available in their district or school. Students at different sites can see and hear the teacher and each other through a system of television monitors, video cameras, microphones, telephone lines, fiber optics, and microwave links.

The EDNET system offers a variety of practical benefits to its users. For-credit classes are available for both public and higher education. A high school student in Ogden, for example, can take a course offered at a high school in Cedar City. College credit classes are also available. Through concurrent enrollment, ambitious high school students can earn both high school and college credit by taking courses offered on EDNET. Currently, there are over 450 EDNET, IP Video and UEN Satellite sites throughout Utah offering courses that range from Physical Geography or American Civilization at the College of Eastern Utah to Spanish 101 from Snow College or Great Literature of America at the Uintah Basin Applied Technology College and Utah State University Education Center in Roosevelt.

Distance Learning training

Something new!

- ⌚ Is provided at your school's EDNET or IP Video facility by the Utah State Office of Education's Distance Learning Training Specialist and Utah Education Network's EDNET Local Service Representative (LSR).
- ⌚ Is required of all EDNET distance learning teachers involved with secondary school students as indicated in the Utah Education Network's *Handbook for Policies, Procedures, and Operations*.
- ⌚ Takes only 20 hours of your time. Teachers will actually prepare, present, and critique their own 7-10 minute mini-lesson over the EDNET distance learning network from their school. Stipends!
- ⌚ Can earn you twenty hours of relicensure credit as well as a certificate of completion. Tied to the new Distance Learning Endorsement.
- ⌚ Is combined with EDNET technical training. You practice on the same equipment that you will use in your day-to-day teaching.
- ⌚ Provides practice in preparing graphics for the *ELMO*, using the microphone, preparing PowerPoint Presentations™, teaching with the Internet, and integrating distance learning technologies with your teaching strategies.
- ⌚ Will show techniques for increasing student interactivity and multimedia teaching in your classes.
- ⌚ Will utilize the web site for EDNET teachers...Resources, Newsletters, and much more. <http://www.usoe.k12.ut.us/curr/ednet/training/default.html>

It's statewide. It's interactive. It's distance learning.
